AIBoMGen Project

This repository contains the AIBoMGen project, which is divided into two main components:

- **AIBoMGen Frontend**: A Next.js-based web application for interacting with the AIBoMGen platform.
- **AIBoMGen Platform**: The backend system for distributed AI training and AIBoM generation.

Results and Experiments

For results and experiments related to this project, refer to the **AIBoMGen Experiments repository**.

Setup and Usage

Refer to the respective README files for detailed setup instructions, usage, and configuration:

- Frontend README
- Platform README

Publication and Dissertation

This repository v1.0 release is prepared for publication on Zenodo.
It is part of a master's dissertation.
